WELCOME

The British Hip Society and the Società Italiana dell'Anca will hold their first combined meeting on 26-27 November in Milan. To our knowledge, it will be the very first time that two distinguished national speciality societies have integrated to organize a joint Congress that will combine their traditions, current practices and future clinical and research trajectories.

By sharing experiences in both primary and revision hip arthroplasty, discussing different techniques (bony fixation, tribology and more), examining the results of hip preserving surgery and arthroscopy, or simply considering everything about the hip, it will be a unique opportunity to improve surgical skills and understand current state of the art clinical practice.

The Congress is open to both members, non-members, international attendees and all who are interested in the hip. The official language of the meeting will be English, simultaneous translation to Italian will be provided.

We look forward to meeting you in Milan.

TOPICS

LECTURES

- Periacetabular osteotomy: grey zones and limits of indication
- How arthroplasty registries will influence clinical practice in the next decade
- Tumours of the hip: current and future solutions

CROSS-FIRES

- One stage vs two stage: changing the standard of treatment of infected THA?
- Cemented vs cementless THA: is one technique suitable for all the seasons?
- Femoral neck modularity: still justified?
- Anterior vs posterolateral approach: fashion and results
- Short vs standard stems: what is the real gain for the patients?
- Resurfacing: is there still an indication?

SYMPOSIA

CERAMIC IN THA

- Ceramic on ceramic clinical results
- The size of the head
- Is squeaking still a reason of concern?
- Is there any evidence that ceramic on poly is better than metal on poly?
- What to do in case of breakage?

TAPEROSIS

- What is the problem?
- What do retrievals tell us?
- Clinical investigation
- Treatment and outcome

PEDIATRIC HIP

- DDH
- SCFE
- Perthes' disease
- Cerebral palsy

REVISION OF THE ACETABULAR SIDE

- Which type of bone graft
- Solutions for large defects
- Is stemmed cup still an option?
- Augments: solution or risk of further problems?
- Cement? Cages?
- Customization of acetabular implant: the near future?

REGISTRY

- Mix and match: is it a real problem?
- Establishing a complete National data base of implants
- Causes of failure in a Regional arthroplasty registry
- How to identify and manage outliers?
- Is Registry data validated and can we afford to publish surgeon level data?

TREATMENT OF PROXIMAL FEMORAL FRACTURE

Update on fixation of intra-capsular femoral fractures
THA vs hemiarthroplasty
Hemiarthroplasty: should cement be used every time?
Hemiarthroplasty: what about cementless stems?
Hip arthroplasty in emergency

INSTRUCTIONAL COURSES

- Indications, techniques and outcomes of hip arthroscopy
- THA in DDH
- Management of THA dislocation
- Management of periprosthetic fractures
- Impaction grafting technique in revision
- Osteotomies around the hip in the young adult: indications and outcomes. Are they joint preserving?

Residents and attendees are kindly invited to bring their own cases for discussion related to the topics during the Instructional Courses.
